

# SOCIOLOGY, BA

Sociology is the systematic study of human behavior or society, particularly its development, organization, and institutions. As a social science, it uses various empirical methods of inquiry to investigate and analyze social order, conflict, and change.

Many sociologists conduct research aimed at directly influencing social policy or at refining and applying the current body of sociological theory to empower community activists, working for justice. Subjects studied range from the micro level of individual behavior and agency to interaction between social groups both large and small to the macro level of social structures. Training in sociology is valued as preparation for graduate work in many professions, as well as careers in nonprofits, state and local government, and business.

The curriculum in Sociology has been designed to develop a comprehensive understanding of human society and to provide enough flexibility for students to pursue areas of individual career or personal interest.

Students may seek a bachelor's or master's degree in Sociology or may pursue the Accelerated BA/MA at Roosevelt University.

Your degree map is a general guide suggesting courses to complete each term on the academic pathway to your degree. It is based on the most current scheduling information from your academic program. Your program's degree map is reviewed annually and updated as schedules change (although you retain the same course requirements as long as you are continuously enrolled in your degree program).

Always work closely with your academic advisor to understand curriculum requirements and scheduling, as each student's academic plan can look slightly different.
