Students will develop a rich and culturally diverse understanding of the critical thinking process. They will enhance their own critical thinking abilities by analyzing varied cultural perspectives on events in the world around them. Because the aim of critical thinking is to deepen your skills at everyday kinds of reasoning, the primary learning goals for this course are focused on expanding your capabilities for: • Understanding the logical structures of the primary classes of arguments used in the everyday contexts of life; • Analyzing arguments within these classes for their strengths and weaknesses; • Recognizing common fallacies in reasoning, including reasoning involving determining probabilities; • Constructing good arguments using principles of informal reasoning; • Reflecting on your own thinking practices; and • Listening to the arguments of others without prejudging these arguments in advance.
