CST 412 - SEMINAR IN THEORY OF COMPUTATION
Recent developments in foundations of computing, new computing paradigms and applications, analysis of algorithms for emerging areas of computer science. Examples of course topics include algorithms for social networking, algorithms of computer learning, computational economics, new CS paradigms of measure and conquer, inclusion/exclusion, and sieve design. The course has a seminar format: students will be asked to read, analyze and present papers.
Credits: 3
Course Notes: CST 280 with a min grade of C- required.

CST 413 - SEMINAR: INFORMATION IN SOCIETY
Focuses on the design and use of collaborative technologies to communicate, share information and coordinate activities. Emphasis will be on the behavioral and social aspects of adopting and using collaborative technologies. However, Computer-Supported Cooperative Work (CSCW) is a socio-technical discipline and the course will cover some technical material. The course includes a discipline overview and history as well as a range of selected topics.
Credits: 3

CST 415 - PARALLEL SYS & HIGH PERFORMANCE COMPUTING
Parallel architectures, present and future; performance criteria and measures; benchmarks; limitations and scalability; the future of high performance computing.
Credits: 3
Course Notes: Cst 280 with a min grade C- required.

CST 419 - CYBER OPS
Cyber Ops certification prepares candidates to begin a career working with associate-level cybersecurity analysts within security operations centers. The Cyber Ops certification program provides practical, relevant, and job-ready certification curricula aligned closely with the specific tasks expected of these in-demand professionals. The Security Operations Center (SOC) Analyst increasingly must focus on design, configuration, and support responsibilities as the technical consultant and device specialist or expert on a security team. Therefore, the Security curriculum is specific to the best practices of network security administrators, engineers, and experts using the latest equipment, devices, and appliances.
Credits: 3

CST 421 - DATA MINING
Methods of knowledge discovery in massive data, i.e. the study of computer-assisted process of digging through and analyzing enormous data sets and then extracting the 'meaning' of the data by applying mathematical methods. The methods that we study in this course are designed to predict behaviors and future trends based on existing data. Topics include classifications techniques, clusterization techniques, association rule discovery techniques, techniques for improving data quality.
Credits: 3
Course Notes: Prerequisites: Math/ASCS 300 with a min grade of C- and, (Math 217 or Econ 234 or Math 347 or ACSC 347, with a min grade of C-).
CST 423 - COOPERATION AND COMPETITION -- GAME THEORY AND APPLICATIONS
Study of the ways in which strategic interactions among autonomous agents produce outcomes with respect to the preferences (or utilities) of those agents. This course covers game-theoretic foundations of cooperative and non-cooperative behavior of independent agents. The course emphasizes applications drawn from artificial intelligence, decision theory, economics, psychology, business management and finance.
Credits: 3
Course Notes: A grade of C- or better in Math/ASCS 300, and in Math 245 or Math 290, or Math 217, or Math 238, or Math 347.

CST 428 - LINEAR PROGRAM & OPTIMIZATIONS
Models of optimization with linear constraints and objectives; simplex method and related algorithms; duality and sensitivity; transportation and assignment problems; games and network flow applications. See also Math 428.
Credits: 3
Course Notes: Math 122 with a min grade C- required.

CST 430 - NUMERICAL ANALYSIS
Solution of equations by iteration; interpolation; numerical differentiation and integration; numerical solutions to linear systems. A computer use course. See also Math 430.
Credits: 3
Course Notes: CST 150 and MATH 232

CST 436 - COMPUTING WITH DATA IN PYTHON
Focuses on using a simple programming language python to work with data when Excel, SPSS and similar tools are not adequate. When tables are too big or the desired result is difficult or impossible to express in terms of formulas, using python can be the quickest, easiest and most productive way to derive value from data in a scientific or enterprise setting. This course provides the skills and understanding required to succeed in these situations.
Credits: 3
Course Notes: Computer programming experience not required., One math class at 1xx or higher

CST 440 - COMPUTER ARCHITECTURE
Internal organization of the components of computer systems with special focus on the design and implementation of the central processing unit and the internal hardware and software structure of a CPU that is normally hidden from the programmers using a high level language. Topics will include combinatorial and sequential circuits, adders, shift registers, computer logic and arithmetic, encoders, decoders, flip-flops, latches, gates and Boolean algebra. Advanced topics include busses, ALU's, memory, cache. Logic expressions, minimization. Digital arithmetic. See also Math 450.
Credits: 3
Course Notes: CST 150 with a min grade C- required.

CST 444 - O.O.P & WEB SERVICES
An intensive course in programming emphasizing the development of reusable software components via the object oriented programming (OOP) capabilities of C#. Topics include user interface controls, exception handling, classes, function overloading and default arguments, operator overloading, event-driven programming, polymorphism and UML. Extensive programming required.
Credits: 3
Course Notes: CST 250 with a min grade C- or CST 365 with a min grade C-, required.

CST 446 - CODING THEORY
Various techniques for developing and implementing codes that can be used to reliably transmit data in the presence of noise. Topics include Hamming codes, error detection and correction mechanisms, linear codes, and cyclic codes.
Credits: 3
Course Notes: Cst 280 and Math 245 both with min grade C- required.

CST 449 - ADVANCE COMPUTER ARCHITECTURE
This course covers instruction set architecture, data path and control unit design, advanced computer arithmetic, pipelining, memory hierarchy and I/O subsystem, performance issues.
Credits: 3
Prerequisites: CST 261 or CST 317

CST 450 - BOOLEAN ALGEBRA & SWITCHING
Logic gates and Boolean algebras. Fundamental building blocks: flip-flops, counters and registers. Logic expressions, minimization. Digital arithmetic. See also Math 450.
Credits: 3
Course Notes: Math 245 or MATH 290 with a min grade C- required.

CST 451 - BIOINFORMATICS
Methods for finding biological and biotechnological information. Online and hard copy methods with an emphasis on the use of various computer databases and the Internet. Basic algorithms will be covered. See also BIOL 461.
Credits: 3
Course Notes: Biol 301 with a min grade C- or instructor consent required.

CST 454 - LOCAL AREA NETWORKS
A practical examination of network topologies, protocols, and operating systems such as Windows NT, UNIX, and NetWare. The OSI 7 layer network model is covered, along with packet switching, text compression, TCP/IP and file transfer protocols. Hands-on network lab experience included.
Credits: 3
Course Notes: CST 246 with a min grade C- or higher.

CST 455 - GRADUATE SEMINAR
Course content varies. Study of the current state of research in a designated area of the computer science. A faculty member introduces initial study of the fundamentals, followed by the study of recent publications chosen by a faculty member.
Credits: 3

CST 457 - SYSTEMS PROGRAMMING
Course includes learning to program with JAVA in UNIX and Windows environments. A computer use course.
Credits: 3
Course Notes: Cst 250 or Cst 365 with a min grade C- required.
CST 460 - INFORMATION SECURITY
Covers current topics in Information Security.
Credits: 3

CST 461 - MACHINE LEARNING
A graduate course in the theory, algorithms and applications of Machine Learning (ML) and the analysis of algorithms by which computational systems learn to perform tasks. Implementation of several ML techniques will enhance the student's understanding of the underlying material.
Credits: 3

CST 465 - NETWORK APPLICATIONS DEVELOPMENT
Design and programming applications for networks and the World Wide Web; client side and server side processing; the use of a web browser as a client and user interface. Internet protocols such as https, ftp, and ssl and issues such as security, reliability, and management. Course includes programming with JAVA in UNIX and Windows environments. A computer use course.
Credits: 3
Course Notes: CST 150 with a min grade of C-.

CST 466 - CRYPTOGRAPHY
Covers current topics in Information Security.
Credits: 3

CST 467 - WEB-BASE DATABASE APPLICATIONS
Interactive web-based applications that use one or several databases. Theoretical and project oriented.
Credits: 3
Course Notes: Any 200 level programming course with a min grade C- or, CST 333 and CST 365 or CST 250 with a min grade C-.

CST 468 - INFORMATION SECURITY
Covers current topics in Information Security.
Credits: 3

CST 469 - MACHINE LEARNING
A graduate course in the theory, algorithms and applications of Machine Learning (ML) and the analysis of algorithms by which computational systems learn to perform tasks. Implementation of several ML techniques will enhance the student's understanding of the underlying material.
Credits: 3

CST 470 - DISTRIBUTED DATABASES
Use of multiple, physically and logically separate databases. Data modeling, horizontal and vertical fragmentation, distributed query processing, concurrency, deadlocks, and recovery techniques. Heterogeneous and object-oriented databases. Functional languages like LISP and ML are studied as well as logic programming.
Credits: 3
Course Notes: 9 Credit Hours of Computer Sci. Min grade of C- required in prerequisite work.

CST 472 - PROGRAMMING LANGUAGES
Global properties of algorithmic languages including scope of declarations, storage allocation, binding time of constituents, subroutines, and tasks. List processing, string manipulation, data description, and simulation languages.
Credits: 3
Course Notes: CST 250 with a min grade C-.

CST 475 - COMPUTER FORENSICS
An introduction to the procedures and techniques used to identify, extract, validate, document and preserve electronic evidence. General legal issues such as the proper handling of evidence, chain of custody, and admissibility in court also covered. See also ACCT 475.
Credits: 3
Course Notes: Ability to download, install, and use basic computer, applications software is assumed.

CST 476 - DISTRIBUTED APPLICATIONS
Advanced topics in web programming and network applications. Use of existing protocols such as HTTP and FTP as well as technologies for designing custom protocols; chat, instant messaging, file sharing, and other technologies. Course includes programming with JAVA in UNIX and Windows environments. A computer use course.
Credits: 3
Course Notes: or any 200 level programming course or Cst 250 with a min, grade C or Cst 365 with a min grade C-.

CST 477 - DB SERVER ADMIN & SECURITY
This class will focus on the administration of database servers and the concerns of the Database Administrator such as configurations, user controls, backup plans, restoration plans, downtime costs, audits, resiliency, stability and reliability, security, joins, load and cascading foreign keys, should I (kNOw)Sql? and other issues that face the database administrator.
Credits: 3
Prerequisites: CST 250 with a min grade C-.

CST 479 - PATTERN RECOGNITION
Statistical and semantical methods of pattern recognition and analysis. Image processing, control, decision making, and problem solving by computer.
Credits: 3
Course Notes: Cst 280 with a min grade C- and Math 217 with a min grade, C- required.

CST 480 - SPECIAL TOPICS
Course content varies. May be repeated for credit with different topics.
Credits: 1-3

CST 481 - INTELLIGENT SYSTEMS
Advanced problems of programming computers to perform tasks commonly regarded as requiring human intelligence. The cognitive aspects of human intelligence will be covered. Introduction to a functional decision language such as LISP or Prolog.
Credits: 3
Course Notes: CST 250 or 365 both with a min grade C- required.

CST 482 - COMPUTER GRAPHICS
Representation, manipulation, and display of two- and three- dimensional objects. Applications to specific problems, including computer games. OpenGL will be taught.
Credits: 3
Course Notes: Instructor consent or CST 250 and MATH 245 with a, min grade C- required.
CST 485 - THESIS/PROJECT RESEARCH
Planning and implementation of research component of student’s MS thesis or project.
Credits: 3,6
Course Notes: Approval of CST thesis sponsor and Dept. Chair required. Must be taken in a semester prior to either CST 490 or, CST 499.

CST 486 - INFORMATION RETRIEVAL
Theory and practice of information retrieval with emphasis on applications to web search. Focus on traditional information retrieval topics (retrieval models, indexing, classification, clustering, etc.) and more recent techniques (ranking of web pages, recommender systems, etc.).
Credits: 3
Course Notes: CST 280 with min grade C- or CST 250 and CST 333 both with a, min grade of C.

CST 489 - SPECIAL TOPICS: COMPLEXITY/DECIDABILITY
Credits: 3
Course Notes: MATH 217 with a min grade of C- or (ACSC 347 with a min grade of C- or MATH 347 with a min grade of C), or Consent of Instructor. Course requires MATLAB, (a mathematical software package). MATLAB is available, on all campus labs (Auditorium, Gage, and Schaumburg). Students who cannot access the software on campus will need to purchase a student version, of MATLAB (approximately $99).

CST 490 - MASTERS THESIS
Completion of the MS thesis.
Credits: 3
Prerequisites: CST 485
Course Notes: Approval of CST faculty sponsor and Dept. Chair.

CST 490Y - MASTERS THESIS COMPLETION
Continuation of the CST Master's Thesis.
Credits: 0
Prerequisites: CST 485
Course Notes: Approval of CST faculty sponsor and Dept. Chair. Students must register for this course if they fail to meet deadlines, for completion of CST 490.

CST 494 - INTERNSHIP: COMPUTER SCIENCE
Advanced in-service learning under faculty supervision.
Credits: 1-3
Course Notes: Consent of Faculty Supervisor required

CST 495 - INDEPENDENT STUDY
Study conducted under the guidance of appropriate faculty member. Proposal must state purpose of study, problem, methods, and means of evaluation.
Credits: 1-3
Course Notes: Consent of advisor and Dept. Chair.

CST 499 - MASTERS PROJECT
Completion of the MS project.
Credits: 3
Prerequisites: CST 485
Course Notes: Approval of CST faculty sponsor and Dept. Chair.

CST 499Y - MASTERS PROJECT COMPLETION
Continuation of the CST Masters Project.
Credits: 0
Prerequisites: CST 485
Course Notes: Approval of CST faculty sponsor and Dept. Chair. Students must register for this course if they fail to meet deadlines, for completion of CST 499.
