

NURSING, BSN

The Bachelor of Science in Nursing Degree program will prepare students for professional careers in the Healthcare field as Registered Nurses (RNs). Students will earn a Bachelor of Science in Nursing Degree (BSN). This program prepares students to become registered nurses by taking the NCLEX-RN exam and obtain licensure from the Illinois Department of Financial & Professional Regulation (IDFPR) and meets crucial national, state, and local needs for Baccalaureate prepared nursing professionals.

In addition to the required general education core, program coursework covers sciences for the profession including anatomy and physiology, pathophysiology, organic chemistry, biology and microbiology, pharmacology and nutrition. Introductory and advanced professional core courses address the fundamentals of nursing care, mental health, maternal care, pediatrics, community, and adult and critical care.

The Commission on Collegiate Nursing Education (CCNE) accredits the baccalaureate degree program in Nursing at Roosevelt University.

Nursing Program Mission:

The nursing program at Roosevelt is grounded in commitment to social justice and caring for the patient's welfare. Healthcare globalization and varied populations mean that diversity, equity and inclusion is needed by nurses in order to provide high quality, safe care. By advancing educational access for a multicultural population of students, our Baccalaureate Nursing Program contributes to building a nursing workforce that meets the healthcare needs of cross-cultural communities. We stand ready to recruit, collaborate, and support a diverse group of students to meet society's need for nursing professionals. Our graduates are educated with strong healthcare values, respecting and reflecting the patient populations they serve. This improves the quality of care and accessibility to individual health care needs.

Education occurs in a diversified, stimulating environment that develops critical thinking and clinical judgment skills in the application of the nursing process. Emphasis is placed on life-long learning and use of evidence-based best practices. Our faculty act as coaches and mentors to our nursing students. Faculty are expert practitioners who utilize an array of learning strategies to capture the various student learning styles.

PROGRAM GOALS

The Nursing Program at Roosevelt University will prepare students to:

1. Practice competent, patient-centered professional nursing care for a diverse group of individuals and populations across the health continuum in a variety of settings.
2. Utilize critical thinking, clinical judgment, evidence-based practice and research findings in professional nursing practice within established ethical and legal boundaries.

3. Demonstrate cultural competence, caring, and collaboration with the healthcare team to meet the client's needs.

4. Communicate effectively in writing, orally and electronically with clients' families and interdisciplinary healthcare team members.

5. Commit to lifelong learning through participation in activities of the nursing profession that benefits the global community

STANDARDS

Professional nursing standards and guidelines are statements of expectations that provide a framework for professional nursing behavior and are developed by the professional nursing community. The Department of Nursing at Roosevelt University uses the following documents as a framework for professional nursing behavior.

- American Association of Colleges of Nursing. (2018). The Essentials of Baccalaureate education for professional nursing practice. Washington, DC: AACN. Retrieved from <https://www.aacnnursing.org/Portals/42/CCNE/PDF/Standards-Final-2018.pdf>
- National League for Nursing. (2010). Outcomes and Competencies for Graduates of Practical/Vocational, Diploma, Associate Degree, Baccalaureate, Master's, Practice Doctorate, and Research Doctorate Programs in Nursing. New York: Author.

BSN Program Essential Functions

Functional Ability Requirements for Nursing Students

Introduction:

in order for safe nursing practice to occur and for students to be qualified to participate in and complete the Nursing program, all nursing students must perform the following essential functions. The program will provide qualified disabled students with reasonable accommodations necessary to enable them to meet the nursing care standards required of them. The American Association of Colleges of Nursing (AACN) and the National Council of State Boards (NCSBN) have defined a thorough list of competencies necessary for the professional practice of nursing.

These competencies were defined from an extensive study of practicing nurses and can be defined in general terms as:

1. Ability to see, hear, touch, smell, and distinguish colors.
2. Oral and writing ability with accuracy, clarity, and efficiency.
3. Manual dexterity, gross and fine movements.
4. Ability to learn, think critically, analyze, assess, solve problems, and utilize judgment.
5. Emotional stability and ability to accept responsibility and accountability.

All educational programs are dedicated to principles of nondiscrimination. This includes a commitment not to discriminate against qualified disabled applicants and students. If a student cannot perform the function in the manner indicated, he or she will not necessarily be precluded from participating in the program, but will need to perform the essential functions with or without reasonable accommodation. Specific functional abilities for nursing students are identified below.

Functional Ability	Standard	Examples of Required Activities	Affective/ Interpersonal/ Emotional /Behavioral	The student must be able to:	• Establish rapport with patients/clients and colleagues. • Work with teams and workgroups. • Emotional skills sufficient to remain calm in an emergency situation. • Skills sufficient to demonstrate good judgment based on diagnosis. • Adapt to environmental changes.
Cognitive/Conceptual Abilities	The student must be able to thoroughly, efficiently and reliably: • Recall information from reading material, lecture, discussion, patient evaluation; • Interpret information from reading material, lecture, discussion, and patient evaluations. • Apply information from reading material, lecture, discussion, patient evaluation; • Analyze information from reading material, lecture, discussion, and patient evaluations. • Synthesize information from reading material, lecture, discussion, and patient evaluations. • Evaluate or form judgments about information from reading material, lecture, discussion, and patient evaluations. • Ability to react effectively in an emergency situation. • Ability to gather data, to develop a plan of action, establish priorities and monitor and evaluate treatment plans and modalities.	•Calculates accurate medication dosage given specific patient parameters. •Analyzes and synthesize data and develop an appropriate plan of care. •Collect, prioritize needs and data. •Recognize an emergency situation and respond effectively to safeguard the patient. •Transfer knowledge from one situation to another. •Accurately process information on medication containers, and medication records. •Understand medical records and policy and procedure manuals.		<ul style="list-style-type: none"> • Establish professional, trusting, empathetic relationships with a variety of individuals. • Demonstrate respect and engage in non-judgmental interactions regardless of individuals' life-styles and cultures. • Accomplish work effectively in groups. • Meet externally determined deadlines. • Be present at required activities in classroom, lab and clinical settings. • Attend to cognitive, communication and psychomotor tasks for as long as four, and up to eight hours at a time. • Ability to work constructively in stressful and changing environments with the ability to modify behavior in response to constructive criticism. • Capacity to demonstrate ethical behavior, including adherence to the professional nursing and student code. 	

Communication	<p>The student must be able to:</p> <ul style="list-style-type: none"> • Hear the spoken word. • Listen and understand in a controlled manner, to various types of communication, including the spoken and written, and non-verbal communication. • Speak intelligibly in English. • Communicate in writing, intelligibly in English. • Relay information in oral and written forms reliably, thoroughly and intelligibly to individuals and groups. • Read English (typed and hand-written). • Read and understand written documents. • Communicate professionally and civilly to the healthcare team including peers, instructors and preceptors. 	<ul style="list-style-type: none"> • Gives verbal direction to or follows verbal directions from members of the healthcare team and participate in healthcare team discussions of patient care. • Elicit information about health history, current health status and responses to treatment from patients or family. • Convey information to clients as necessary to teach in an effective and timely manner. • Establish and maintain effective working relations with patients. • Recognize and report pertinent information to multidisciplinary team and caregivers. 	Psychomotor/Motor Abilities	<p>The student must be able to:</p> <ul style="list-style-type: none"> • Reliably inspect and observe the skin, facial expression, anatomical structures, posture, and movement of others, typically by sight. • Assess blood pressure, lung and heart sounds, typically by listening with a stethoscope. • Reliably read equipment dials and monitors, typically by sight. • Feel pulses, skin condition, muscle and tendon activity, joint and limb movement, typically with hands and fingers. • Negotiate level, ramps and stairs to assist patients/classmates appropriately, typically from an upright position. • React and effectively respond quickly to sudden or unexpected movements of patients. • Manipulate dials, knobs, electrodes and other small to large parts and pieces of equipment typically with the hands/fingers. • Lift at least approximately 50 pounds in order to move dependent patients; • Move continuously throughout an 8 to 12 hour work day; • Transport self from one room to another, from one floor to another. • Don and doff clothing, including gowns, masks, gloves. • Demonstrate motor skills sufficient for providing safe nursing care. 	<ul style="list-style-type: none"> • Mobility sufficient to carry out patient care and procedures such as assisting with ambulating clients, administering CPR, assisting with lifting/turning patients. • When providing care to patients, allow privacy at all times. • Motor skills sufficient enough to handle small equipment such as, administering medications via all routes, Foley Catheter insertion and tracheostomy suctioning.
---------------	---	---	-----------------------------	--	--

Sensory Abilities	<p>The student must be able to:</p> <ul style="list-style-type: none"> • Have sensory/perceptual ability to monitor and assess clients. • Sensory abilities sufficient to hear alarms, and auscultatory sounds. • Visual acuity to read calibrations, assess color such as cyanosis, pallor or redness. • Tactile ability to feel pulses, temperature, and palpate veins. • Olfactory ability to detect smoke or noxious odor.
-------------------	---

Students must complete the entire nursing program within eight consecutive calendar years.

Students must complete all nursing courses within four consecutive calendar years and graduate or must repeat the program in its entirety.

The nursing courses must be taken in the order prescribed in the curriculum plan.

Students must complete all examinations administered during the program, including HESI exams. Students are responsible for all HESI testing fees.

A grade of C is the minimal acceptable grade for any course to be applied to the nursing major and the supporting sequence or acceptable as a prerequisite for subsequent courses.

A minimum cumulative GPA of 2.0 is required for all courses in the major.

Completing all nursing course requirements (NURS) for the BSN degree must be accomplished at Roosevelt University. Under special circumstances, with written permission to take required courses elsewhere or transfer a course in may only be granted by the Director of Nursing.

Transfer credit for AHS 130 HUMAN ANATOMY &PHYSIOLOGY I and AHS 131 HUMAN ANATOMY &PHYSIOLOGY II (Human Cadaver Anatomy and Physiology I and II) must contain proof that a cadaver lab was a part of the course. Students without previous anatomy and physiology cadaver lab experience may take AHS 230 CADAVER ANATOMY &PHYSIOLOGY (Cadaver-Based Anatomy & Physiology Lab) and once that class is completed with a grade of C or better, they can receive transfer credit for AHS 130 and 131. Students taking AHS 230 with previous Anatomy and Physiology education will be asked to take a placement test to evaluate their level of Anatomy and Physiology knowledge.

Nursing students must maintain a cumulative C (2.0) grade point average and a grade of C or above in every course taken at Roosevelt University. Students who do not achieve this level of academic progress will be dismissed from the program. A student may submit an application and appeal for re-admittance to the Nursing Program one time; an appeal does not guarantee approval. There is only opportunity to appeal one time.

All nursing (NURS) courses carry weighted grades of which students must receive at least a 78% to pass with a C. There is no rounding of grades in any nursing course. Professional behavior is expected of nursing students both on and off campus. Students will professionally conduct themselves at all times; this includes theory, clinical and lab

experiences. Students are responsible for all written/verbal information that is shared in scheduled classes, labs and clinical. Students must sign and adhere to the policies and procedures in the Nursing Student Handbook. Failure to sign or violate these can result in the student being dismissed from the program.

Before clinical experiences, students must be cleared for clinicals from the Nursing Clinical Coordinator. All students are placed at their clinical sites through Roosevelt University and students are expected to follow the policies and procedures set in place for this as outlined by each clinical site. Students are responsible for transportation to various clinical site locations both in the city and suburbs of Chicago and must carry health insurance and provide proof of such.

Bachelor Degree Requirements Met 126

Students must earn a minimum of 126 semester hours.

Students may apply no more than 60 credit hours of 100-level courses toward the degree.

Students may transfer in no more than 70 credit hours from community college.

Students must take their final 30 hours at Roosevelt University. Note that some majors have additional requirements for RU hours.

Students must have a grade point average of 2.0 or higher to graduate. Note that some majors have additional GPA requirements.

Year 1
